

Reptile Rough to Silky Soft Face Pack

ASTON LR137/05

Have fun with this creative face pack, which dries in a novel way to make your skin look “reptile rough”!

As well as the entertainment value, this mask also gently exfoliates your skin for a brighter, smoother look, using a synergistic combination of physical and chemical exfoliators.

Apply generously to the face and leave on the skin for 15-20 minutes. The mask will give a fun “reptile-like” appearance as it dries, and will leave your skin looking radiant and feeling silky soft after rinsing.

Containing:

- **Perlite** is a volcanic glass that contains water in its inner structure. When flash heated, the water contained within the structure turns to steam and the Perlite expands like popcorn to give amazing spherical structures:
 - **ImerCare 190P** – Natural mineral scrub bead made from Perlite. D90 particle size of 190 microns. Recommended for use in facial scrubs.
 - **ImerCare 20P** – Natural mineral powder with an average particle size of 20 microns. The Perlite spheres are milled to give broken spheres that have great transparency on the skin. The non-lamellar structure of these particles leads to light scattering that gives a matte effect.
- **Lime Pearl AF** – Extract from Caviar Lime, a green to deep purple-black cylindrical fruit that is endemic to sub-tropical rainforests of Australia. Rich in Alpha Hydroxy-Acids (AHAs) which gently improve skin exfoliation with an innovative process through Transient Receptor Potential Vanilloid-3 (TRPV3) to give a smoother, brighter and more even skin complexion.

Reptile Rough to Silky Soft Face Pack

ASTON LR137/05

PHASE	INGREDIENT	SUPPLIER	%	COMPOSITION	FUNCTION
A1	DEIONISED WATER		56.70	Aqua	Solvent
A1	LIME PEARL AF	Aston/ Southern Cross Botanicals	2.00	Glycerin, Aqua, Microcitrus Australasica Fruit Extract	Extract of Caviar Lime from Australia. It is rich in AHAs and provides gentle skin exfoliation.
A2	OPTIGEL CK-XR	Aston/ BYK	18.00	Bentonite	Mineral powder that forms a 'house of cards' structure in water to impart structure and stability. Feels soft on the skin.
A3	CITRIC ACID, 20% SOLUTION		6.00	Aqua, Citric Acid	pH adjuster
B	SYNCRYSTAL SPRING GOLD	Aston/ Eckart	1.00	Synthetic Fluorphlogopite, CI 77491 (Red Iron Oxide), CI 77891 (Titanium Dioxide), Tin Oxide	Spring gold pearlescent pigment based on a Synthetic Fluorphlogopite substrate with average particle size 10-50 microns.
B	FRAGRANCE		0.10	Parfum	Green tea fragrance
B	EUXYL PE 9010	Schülke & Mayr	0.70	Phenoxyethanol, Ethylhexylglycerin	Preservative
B	0.5% BLUE 1 IN WATER		0.50	Aqua, CI 42090	Blue dye that contributes to green colour of formulation
B	IMERCARE 190P	Aston/ Imerys	2.00	Perlite	Natural mineral scrub bead made from Perlite. D90 particle size of 190 microns. Recommended for use in facial scrubs.
C	IMERCARE 20P	Aston/ Imerys	13.00	Perlite	Natural mineral powder with an average particle size of 20 microns. It is made from Perlite (volcanic glass) and gives great transparency and a mattifying effect on the skin.

METHOD

- 1) Combine A1s then add A2 and homogenise at high shear (e.g. 8,000 rpm on a Silverson) for 10 minutes.
- 2) Adjust pH to around pH 6.5 using A3.
- 3) Add Bs and mix until homogeneous (do not use high shear).
- 4) Add C and paddle stir until a homogeneous paste has formed.
