

Regenerating Two Phase Cleanser

ASTON LR126/16

Shake up this naturally-derived cleanser to combine the benefits of both phases.

This two-phase formulation harnesses the power of naturally derived emollient esters, SHAJIO Buckthorn Berry Oil and D-Glycargine to provide dual-action: cleansing and regeneration.

Containing:

- **Beantree** – Ecocert approved, plant derived emollient ester with a light skin feel that feels similar to volatile silicones.
- **Trivent OC-G** – Outstanding naturally derived emollient ester, carrier and co-solvent. It has a silky, non-oily and non-tacky skin feel.
- **SHAJIO Sea Buckthorn Berry Oil** – Supercritical CO₂ extract of Sea Buckthorn Berries rich in rare omega-7 palmitoleic acid, carotenoids and tocopherols that protect skin. It has anti-inflammatory and anti-ageing properties and promotes epidermal regeneration.
- **D-Glycargine** – Aqueous solution of Arginine PCA, ester formed from Arginine and L-PCA (physiological molecule which is part of the skin's Natural Moisturising Factor). Anti-ageing ingredient which exhibits anti-glycation activity to help to recover skin firmness.

Regenerating Two Phase Cleanser

ASTON LR126/16

PHASE	INGREDIENT	SUPPLIER	%	COMPOSITION	FUNCTION
A	D. I. WATER		14.00	Aqua	Solvent
A	GLYCERIN		42.80	Glycerin	Humectant
A	D-GLYCARGINE	Aston/ Solabia	2.00	Aqua, Arginine PCA	Aqueous solution of Arginine PCA, ester formed from Arginine and L-PCA. Anti-ageing ingredient which fights against glycation to help to recover skin firmness.
A	EUXYL PE9010	Schülke & Mayr	0.50	Phenoxyethanol, Ethylhexylglycerin	Preservative
B	BEANTREE	Aston/ Alzo	30.00	Metylheptyl Isostearate	Ecocert approved, plant derived emollient ester with a light silicone-like skin feel.
B	TRIVENT OC-G	Aston/ Alzo	10.00	Tricaprylin	Naturally derived emollient, carrier and co-solvent. It has a silky, non-oily and non-tacky skin feel.
B	SHAJIO SEA BUCKTHORN BERRY OIL	Aston/ Aromtech	0.50	Hippophaë Rhamnoides Oil	Supercritical CO ₂ extract rich in rare omega-7 palmitoleic acid, carotenoids and tocopherols that protect the skin. Has anti-inflammatory properties and it promotes epidermal regeneration.
B	FLAVOUR		0.20	Flavour	Passionfruit Flavour

METHOD

- 1) Combine As and pour mixture into bottom half of componentry.
- 2) Combine Bs, stir until homogeneous and add to the componentry.
- 3) Shake vigorously and leave to separate.
